### **Executive Summary**

The Center for Effective Lawmaking (CEL) is pleased to announce the release of the State Legislative Effectiveness Scores (SLES) for the recently completed 246<sup>th</sup> New York Legislature legislative session. This report offers highlights from our initial analyses of these scores, including:

- We identify the top-10 most effective lawmakers in each party in the State Assembly and State Senate, including many who continued their patterns of highly effective lawmaking from the previous legislative sessions.
- We identify those lawmakers with the longest streaks of being in our prestigious “Exceeds Expectations” category, as well as first-term lawmakers in this category.
- We find that, consistent with our published research findings, there is an overall lawmaking benefit from being in the majority party. Although some individual minority-party legislators achieved high lawmaking effectiveness, their average scores remain lower than their majority-party counterparts due to structural barriers that they face in trying to advance their agendas.
- Across both chambers, serving as a committee chair is related to greater lawmaking effectiveness. In addition, lawmaking effectiveness is a consistent trait among legislators, with several legislators appearing among the top-10 most effective lawmakers for both the 246<sup>th</sup> and 245<sup>th</sup> legislative sessions.

### **Introduction and Methodology**

The State Legislative Effectiveness Scores discussed here are based on the combination of fifteen metrics capturing the bills that each member of each state legislature sponsors, how far their bills move through the lawmaking process, and how substantial their policy proposals are. Following common practice for New York (<https://nyslrs.state.ny.us/racfssl.html>), legislators also receive credit when an identical bill from the other chamber is substituted in place of their originally-sponsored bill, and that substitute bill ultimately passes their home chamber and/or becomes law. The scores are normalized to an average value of 1.0 in both the State Assembly and the State

Senate in each legislative session. More on our [methodology](#) and [scores](#) can be found at our website.

For each member of the State Assembly and State Senate, we also identify a Benchmark Score, based on the average lawmaking effectiveness of legislators who share that legislator's majority- or minority-party status, level of seniority, and chair position on a committee. Controlling for these considerations is important in order to describe legislators on a more level playing field. For example, in the 246<sup>th</sup> New York State Assembly, minority-party lawmakers had an average SLES of 0.49, compared to 1.23 for majority-party members, while committee chairs had an average SLES of 1.98. In the State Senate, those averages were 0.41 in the minority party, 1.29 in the majority party, and 1.31 among committee chairs.

We then label each lawmaker as “Exceeding Expectations” for those outperforming their benchmark scores by 50% or more, “Below Expectations” for those below 50% of their benchmark, and “Meeting Expectations” for all other legislators.

Finally, within each party, we rank each member according to their SLES. This ranking is used to generate the Top Ten lists highlighted in the tables below. Given the substantial lawmaking benefit that follows from being in the majority party, ranking the entire New York State Legislature together would be inappropriate, but these comparisons within each party are quite informative.

### **Highly Effective Democratic Lawmakers in the 246<sup>th</sup> State Assembly**

The following table identifies the ten highest-scoring Democrats in the 246<sup>th</sup> State Assembly. Unsurprisingly, given the power of committee chairs, all ten Assemblymembers held these important positions.

### **State Senators with Longest Streak of “Exceeding Expectations” (through the 246<sup>th</sup> Legislative Session)**

### **High-Performing Freshmen**

One way to identify future legislative leaders is to identify freshman Assemblymembers and Senators who earned an “Exceeds Expectations” rating in their first term. For freshman legislators, their initial scores are compared to benchmarks for newcomers—so when a freshman outperforms their cohort, it can reveal strong political acumen, the ability to navigate legislative procedures quickly, and skill in coalition-building or policy entrepreneurship. These traits often correlate with future leadership roles. Our research on the U.S. Congress suggests that legislators who perform well early on are more likely to be selected for committee chairs or leadership positions and influence major legislation in subsequent terms. Hence, identifying high-performing freshmen can offer early signals of who might rise through the ranks.

## Freshmen Assemblymembers “Exceeding Expectations” (246<sup>th</sup> Legislative Session)

	<u>Name</u>	<u>SLES (in 246<sup>th</sup>)</u>
1.	MaryJane Shimsky (D-92)	1.21
2.	Alex Bores (D-73)	1.16
3.	Brian Maher (R-101)	0.81
4.	Matthew Slater (R-94)	0.75

The State Assemblymember with the highest “Exceeds Expectation” score during his freshman term was Assemblymember MaryJane Shimsky from District 92 (Westchester county) with a score of 1.21. She graduated from Yale University and New York University School of Law and earned a PhD in History from the City University of New York. Assemblymembers MaryJane Shimsky, Brian Maher, and Matthew Slater were all reelected to their seats. In addition, Assemblymember Alex Bores announced his candidacy in October 2025 for New York’s 12<sup>th</sup> District in the House of Representatives.

### Conclusion

The 246<sup>th</sup> New York legislative session demonstrated consistent patterns in legislative effectiveness, with experienced legislators, committee chairs, and majority-party members continuing to hold a distinct advantage in advancing their policy agendas. Across both chambers, many of the most effective lawmakers continued their high performance from previous sessions, indicating a durable capacity for lawmaking among key figures. These findings underscore the importance of institutional positions and experiences in shaping legislative outcomes in New York.
